

Alexandrite Ring with Diamond Accents **Donated by Allen and Linda Beermann**

This beautiful genuine Alexandrite stone is set with small diamond accents. Often described by gem aficionados as “emerald by day, ruby by night,” alexandrite is the very rare color-change variety of the mineral chrysoberyl. This beautiful ring may be easily resized for any wearer!

Allen and Linda Beermann have been prominent supporters of the Lincoln community for decades, and are pleased to support the tallgrass prairie.

Thank you, Allen and Linda, for your support of Spring Creek Prairie Audubon Center!
